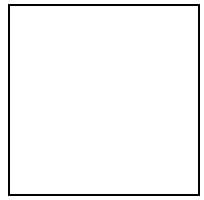
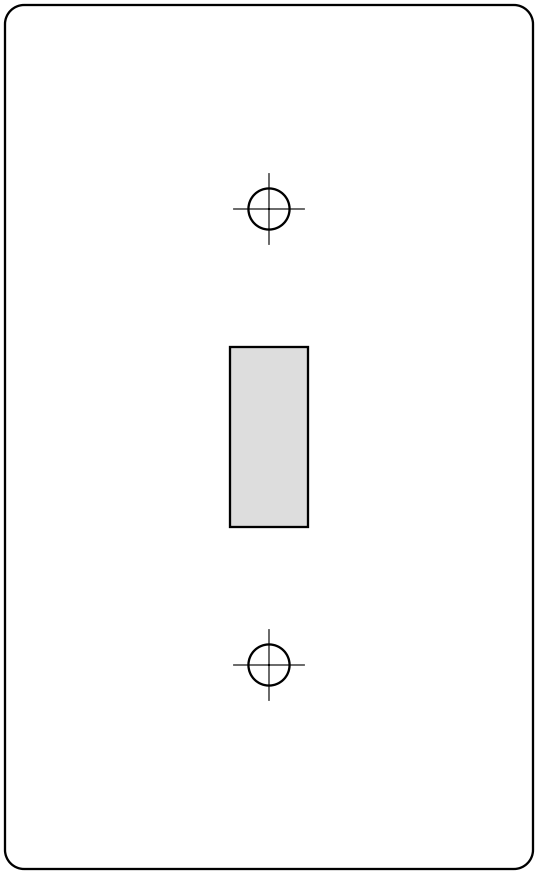
DO I NEED BACKING PLATES?

CARDBOARD TEST TEMPLATES

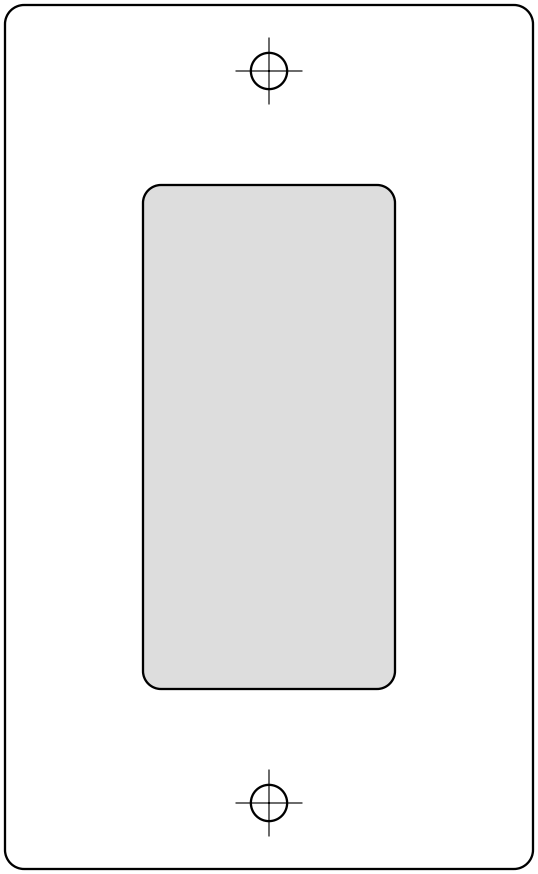
1. **Print at 100% / "Actual size"** (turn off "Fit to page"). Check that the square on the right measures exactly 1 inch.
2. Glue or tape the page to a piece of cardboard, then cut along the outer line and cut out the shaded opening.
3. With the power off and your old plate removed, slip the template over your switch or outlet.
4. If it sits flat against the wall, you don't need backing plates. If there's a gap you don't like, add backing plates to your order.



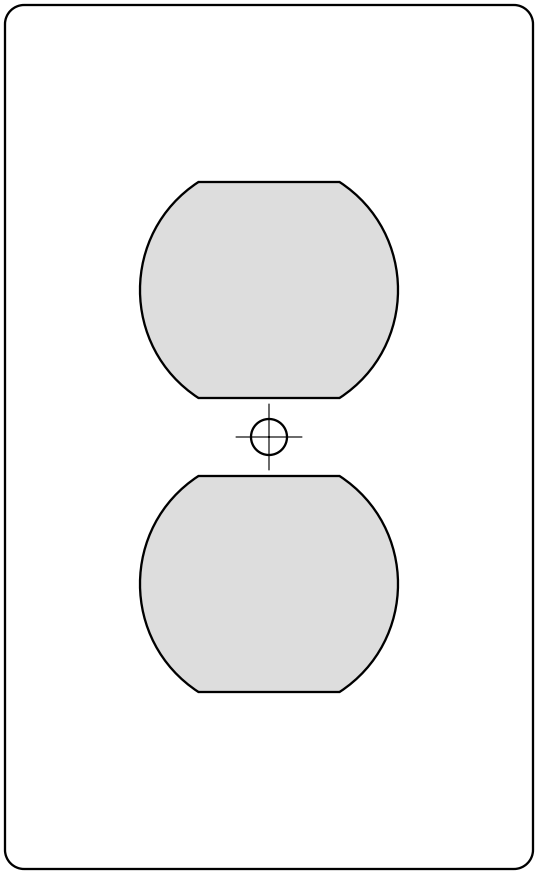
1 inch



TOGGLE
Standard flip switch



ROCKER / DECORA
Rocker, GFCI, USB, smart switch, dimmer



DUPLEX OUTLET
Standard two-plug outlet
